Shaped Panels

About MPanel Shade Designer

A complete design and patterning software with no additional CAD system or drafting experience required!

A powerful, yet easy to use wizard interface guides the user through each aspect of patterning a sail. Simply follow the step-by-step tabs to develop your project. Add user and project details, select materials and fittings, then add site dimensions then produce patterns. All this without a CAD system or patterning experience and completed in minutes.
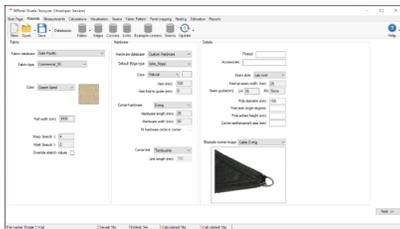

No CAD Required!

IFAI

MPanel Shade Designer

Recommended for companies and individuals creating shade sail structures constructed with HDPE knitted fabrics. MPanel Shade Designer provides everything needed to design, panel and produce fabric shade sail projects.
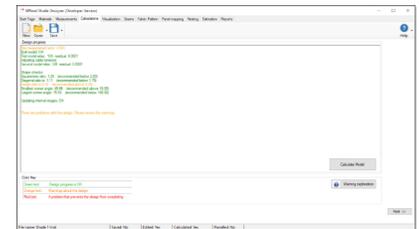

The easy to follow, step-by-step interface guides the user through each phase of the process ensuring the best possible result with no guessing. Start by entering user details, then:

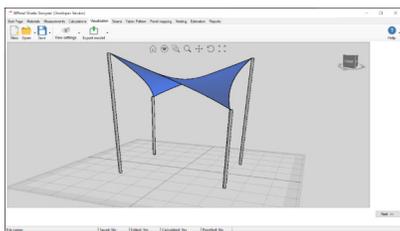

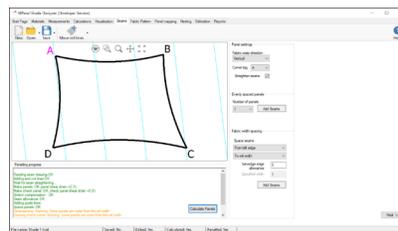

Select materials and fittings

Add site Measurements

Check model & site measurements

Vizualize the model in 3D

Convert mesh to a single panel

Split mesh into multiple panels

Pattern - Single Panel

Pattern - Multi Panel
