

# Version 8

## Update news

MPanel product development is driven by requests from you, our users.

Version 8 update is a feature packed example with requested new features and upgrades. Please keep the ideas coming—we're always happy to learn new ways our products can help you. Email us at [support@mpanel.com](mailto:support@mpanel.com).

## New Tensile Conic Structure

This powerful new tool provides free form tensile conic structure designs to be included in MPanel InSite and your sales proposals:

- Multiple poles/walls can be used to create these new structures so you are not limited to 3 or 4 sided structures
- Conics can include fixed edges or can be fixed/connected to walls
- 2 conics can share poles and can be joined
- Export to obj works with conics
- Export to Sketchup® works with conics

## Other changes & updates

- Startup log window will close automatically after 1 minute.
- The program is now 64 bit for faster execution and larger image sizes.
- A 32 bit is available for old computers for 12 months providing time to upgrade old hardware.

---

We trust you will enjoy these new features and that they will benefit your company.

Thank you for your continued support and we again, encourage you to provide feedback and suggestions for improvements.
