

# Version 9

## Update news

MPanel product development is driven by requests from you, our users. Version 9 update is a feature packed example with requested new features and upgrades. Please keep the ideas coming - we're always happy to learn new ways our products can help you. Email us at [support@mpanel.com](mailto:support@mpanel.com).

### New Export Options

Fabric structure models created in InSite can now be exported/saved for patterning and engineering analysis:

- Export models to MPanel for patterning using MPanel-Pro
- Export models for structural analysis using MPanel FEA
- Saved InSite models can now be imported into MPCore Apps to produce patterns for Framed Shade Structures, Umbrellas, Conics, Arched Structures and Marquee/Pole tents.

### New Selection Options

New selection options in InSite V9 speed up designs:

- Marquee selection of multiple items such as poles to change properties of selected items at the same time.
- Shift>Select to de-select items previously selected
- Conics can now be added to library models

### Other new features

- Conics models can now be added to library models

We trust you will enjoy these new features and that they will benefit your company.

Thank you for your continued support and we again, encourage you to provide feedback and suggestions for improvements.
