

THE ACCESS PLATFORM FOR PROFESSIONAL FABRIC PATTERNING

Already Using InSite?

You're only one step away from fabrication.
With MPCore + Apps you can:
Design in InSite → Import → Pattern → Cut
No external CAD required.
Move from sales visuals to real, buildable
fabric structures

About MPCore

MPCore is a simplified 3D workspace designed specifically for non-CAD users in the tensile fabric industry

It allows users to:

- Operate MPanel Pro, Production & FEA without the need for CAD
 - Use dedicated Fabric Structure Apps
 - Generate real fabrication-ready patterns

No External CAD Required!
DWG & Rhino file support

Tensinet

Specialised
Textiles
ASSOCIATION
MEMBER

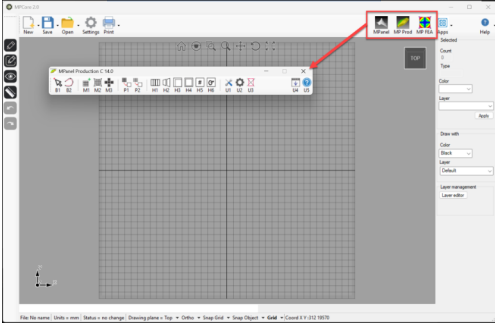

For use on Microsoft Windows Vista, Windows 10-11 (64 bit) PC platforms,
or MAC computers running an equivalent Windows emulator.

ONE PLATFORM MULTIPLE FABRIC STRUCTURE SOLUTIONS

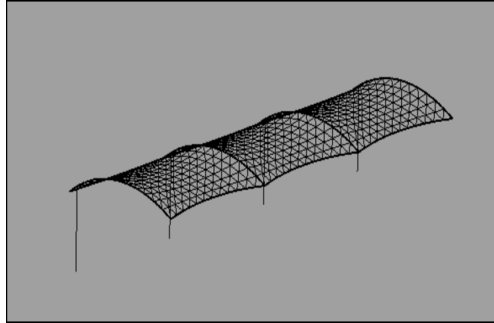

Access MPanel Pro / Production / FEA

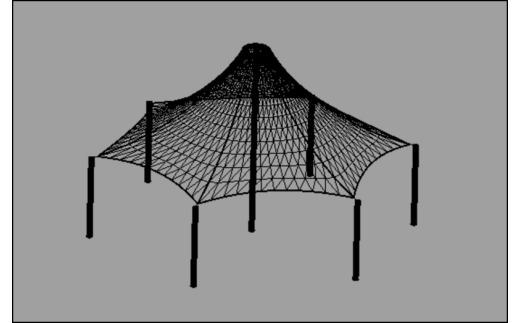

Run licensed MPanel Pro, Production and FEA directly inside MPCore without having to purchase additional CAD licenses

Arched Shade App

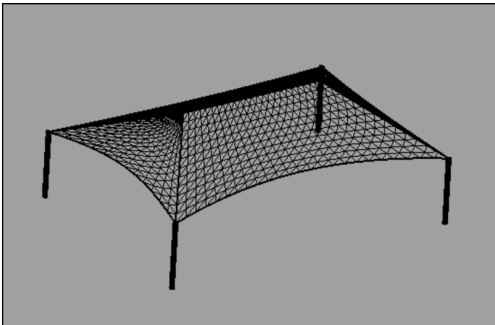

Build multi-bay arched structures or import from InSite to produce form-fitting patterns for hand or machine cutting.

Conic App

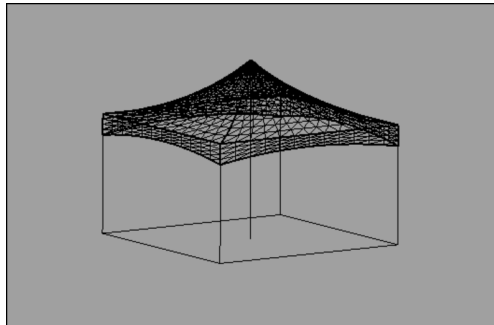

Build multi-sided tensile conic structures or import from InSite to produce form-fitting patterns for hand or machine cutting.

Framed Shade App

Build rectangular and polygon framed structures or import from InSite to produce form-fitting patterns for hand or machine cutting.

Pole Tent/Marquee App

Define pole tent/marquee structures to produce form-fitting patterns for hand or machine cutting.

Umbrella App

Build umbrella structures or import from InSite to produce form-fitting patterns for hand or machine cutting.

APPS Simply enter parameters to build the model, generate panels, apply compensation, add seams and hems, and output for hand or machine cutting - all in minutes and no CAD required.

👉 **“Only one MPCore license required - Add apps as needed”**
