Version 10
Update news

MPanel product development is driven by requests from you, our users. Version 10 update is a feature packed example with requested new features and upgrades. Please keep the ideas coming - we're always happy to learn new ways our products can help you. Email us at support@mpanel.com.

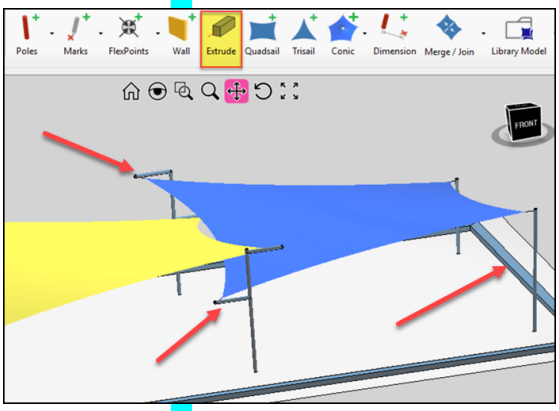

Join sails with tension

Joined edges can optionally have a tension specified. This simulates a stiff element such as a webbing strap or cable sewn along the join, and allows joined shapes that have ridges in the shape.

Join tension

New Extrude Tool

Extrusions can be used to represent site detail, such as:

- low boundary walls/borders e.g. railway sleepers around a sand pit or soft-fall area
- existing non structural walls or areas
- horizontal extension to poles (often called outriggers)

Extrude Tool

Other new features

- Confirmed compatibility with MPCore app imports
- Export sail to Shade Designer now includes mid-connections

We trust you will enjoy these new features and that they will benefit your company.

Thank you for your continued support and we again, encourage you to provide feedback and suggestions for improvements.
